

Inspection Summary

Client: Desert Springs Tilapia
Vessel/Plant: Not Specified
Product: Fresh Tilapia – Fillet & Whole/Round
Inspection #: 6271D
Inspection Date: July 21, 2006 - Seattle, Washington
Inspected By: Bart Lovejoy

Condition of Inspection

Lot ID: Not Applicable
P.O. # Terry Delaney
Sample Size: 2
Sample Receiving: Delivered
Sampling Plan: Determined by Client
Specifications: None Provided
Inspection Method: Total Mercury by CVAA (US EPA Method 7471)
Method Detection Limit: 0.019 mg/kg

Condition of Inspection: Two (n=2) samples consisting of fresh Tilapia fillet (n=1) and fresh, whole/round Tilapia were delivered to the Surefish Laboratory in Seattle, WA. The client selected the samples. The client determined the sampling plan. At the client's request, the samples were submitted for total Mercury analysis. Results are reported as mg/Kg or as 'None Detected' if result is less than the method detection limit.

SUMMARY OF RESULTS

Sample Description	Total Mercury (mg/kg)
Fresh Tilapia Fillet	None Detected (<0.019)
Fresh, Whole/Round Tilapia	None Detected (<0.019)

We warrant only that analyses and services are performed in good faith and in accordance with accepted, established procedures of science or trade
